

```
/*
    Command line input is also called as non-interactive input
    Here argc means count of arguments and argv means argument
values
*/
main(int argc, char *argv[])
{
    int i;
    for(i=0;i<argc;i++)
        printf("%d = %s\n",i,argv[i]);
    printf("New Name is : ");
    for(i=1;i<argc;i++)
        printf("%c",argv[i][0]);
}
```
